ITES010 - Data Protection

Develop the skills needed to manage and process personal data in the context of GDPR.

Learn from the Best in the Business!

Course overview

Foundation level

Why take this course

Develop the skills needed to manage and process personal data in the context of GDPR.

The Data Protection module covers important knowledge relating to data protection concepts and principles, data subject rights, data protection policies and measures, and regulatory compliance.

With more and more activities and transactions going digital, a growing number of workers find themselves handling sensitive personal data. It is more important than ever that the people working with personal data have the skills to do so securely and legally. This module sets out essential knowledge relating to data protection concepts and principles, data subject rights, the implementation of data protection policies and measures, and regulatory compliance.

Who it is for and how it helps

The personal consequences for individuals of a breach of the security of their personal data can be substantial, as can be the legal and commercial consequences for organisations. An understanding of data protection concepts is increasingly valued by employers. This module is relevant for organisations inside and outside the European Union.

What you will learn

- Understand concepts relating to personal data and its protection;
- Understand the rationale, objectives, and scope of the European Union General Data Protection Regulation (GDPR);
- Outline the key principles of the GDPR relating to the lawful processing of personal data;
- Understand the rights of data subjects and how they are upheld;
- Understand that company policies and methods should comply with data protection regulations, and outline key technical and organisational measures to achieve this;
- Understand how to respond to data breaches and the consequences of not complying with data protection regulations.

Pre-course requirements

- Basic understanding of modern IT solutionsand how computers work

Participation and contacts

Joining the programme

Contact the Academy and quote course code 000236 to confirm dates, delivery format, prices and enrolment terms.

Training for your team

Tell us your business goals, the roles and number of participants, and your preferred dates and location. This will help us discuss the right training option.

Preparing for the programme

Read the pre-course requirements in this programme before enrolling.
