Career synopsis

Long technical career journey of around 30 years full of success, hard work, problem solving, commercial aware, innovative and high-quality technical Well Engineering solutions for the majority of the technical challenges during this long journey which includes 17 years as Shell employee , 3 years PDO Oman as direct hire and first 10 ears in my technical life was with PETROBEL (Egypt-ENI JV)

Have worked onshore /offshore Egypt and overseas too wells experience, HSE and Well Integrity & Well Process Safety as top priority focus including drilling, completion, well integrity, well interventions and work over including conventional, HPHT , gas and oil wells, Hot , cold wells.

Also, I have been involved in the design and execution of heavy oil/Hot wells and polymer flood during my assignment with PDO OMAN as I been leading PDO South drilling, completion and work-over team for Amal Steam flooding, Marmul Polymer flood , Rajaa-18 Dumpflood, Wire-Line retrievable ESP , applying Lean Process , DWOP, SWOP, e-DTL etc. from 2005 to 2014.

Recent +7 years with Shell Egypt, seconded to BAPETCO where we have creatively installed 2 718” velocity string in old, depleted gas wells using conventional well pulling unit with ZERO formation damage saving 50% of the budget compare to use the Hydraulic work-over unit addition to too many initiatives which positively impacted in the overall HSE and operation performance.

Insightful, safe results-driven self-motivated, trustworthy, creative and team work Well Engineering professional with notable success directing a board range of corporate well engineering/production optimization initiatives while participating in planning, program build, optimization and implementation of solutions in support of business objectives.

Excel at providing comprehensive perfect well design, proficient operations’ execution and troubleshooting and full well integrity and project lifecycle project management. Hands-on experience leading all stages of well delivery process including; define, design, review, execute and close out.

Outstanding project and program leader; able to coordinate, elaborate and direct all phases of project-based efforts while managing, motivating, and guiding teams towards goal zero applying Assist & Assure technique.

Highly creative and multitalented Well Engineer with extensive experience in supervision of Drilling, Completion, Work Over and Well Services operations, exceptional collaborative; and interpersonal skills; dynamic team player.
