

Ahmed Mahboub

Студент

A qualified Electrical Maintenance and Controls engineer possessing extensive experience in the maintenance of drilling rigs and industrial plants, during my career, I have provided remote and field technical support for Rigs in North Africa, Arabian Gulf and Asia. I shared in many project upgrades working with multinational teams in varying roles, sometimes as a team player and others as a leader. My target is to decrease the downtime caused by equipment failure to minimal and respond to client requests for operational and safety improvements. I have prepared and instructed technical training for our team members in many countries.
