Биография

Dedicated petroleum reservoir engineer with more than 16 years of experience, I am working with SONATRACH (Algerian national oil company) as a reservoir engineer in Hassi Messaoud oil field.

I hold a bachelor degree in mining engineering for National polytechnics school of Algiers and MSc in reservoir engineering from Robert Gordon University of Aberdeen.

I worked in a multidisciplinary and international team (geologists, petrophysicists, reservoir and production engineers from Halliburton and Sonatrach) for the optimization of the production of the Hassi Messaoud oil field.

I have a good knowledge in production and injection monitoring, and I am skilled in well problem solving of both new and matures fields.

I have training experience with the Algerian Petroleum Institute, where I trained newly recruited engineers and technicians in Fundamentals of Reservoir Engineering and Petroleum geology basics.

Профессиональный опыт

Апрель 2009-По настоящее время - Petroleum Reservoir Engineer - SONATRACH, Algeria

- I have mentored and trained many junior reservoir engineers who have little professional experience, in petroleum geology and reservoir engineering fundamentals in addition to well test operations and results interpretation principals.
also, I have assessed and examined fresh graduate engineers and technicians in thier dissertation.
- Разработка учебных программ
- Обучение персонала
- Проведение проверки знаний/ассесмент
